

Virtual Accounting Internship Program

Are you finding it challenging to secure internship opportunities for your students at local accounting firms or help them meet career readiness standards?

Our **Virtual Accounting Internship Program** can expose your students to the powerful world of accounting. This year-long program prepares students prior to stepping into a physical workspace, and gives them the opportunity to test and try concepts in a risk-free simulated environment. And unlike a physical internship, your students will get to experience and learn all aspects of accounting. They'll gain valuable skills and get to uncover which areas they like most and where they'd like to focus in the future, or major in at college.

Key Benefits

- Higher engagement in learning the fundamentals of accounting using numbers from a simulated business students are managing
- Help students get familiar with business transaction forms such as customer invoices, paid checks, paystubs, time sheets, and bank statements.
- Motivational tools such as the "Animate Transactions" mode show transactions flying out of student's business and into accounting documents
- Forensic Accounting lessons enable students to analyze and review financial documents to try and solve for inconsistencies due to fraud or errors
- Meets career readiness, preparation, and workplace essential standards
- Includes an exciting end-of-year culminating project
- Gives teachers all the lessons, activities, tools, and resources to help students find success
